

200603 M5 | L1 Lab Launch Plan Template

Exercise 2: Develop a launch plan for the scenario

Part I: Complete the launch plan based on the product concept and additional information provided.

Product launch plan template	
Planning component	Recommended entries
Launch strategy	• Define the overall launch strategy and objectives • Include product launch forecasts
Messaging and positioning	• Define the product messaging strategy • Outline product positioning considerations
Pricing and discounting	• Define the product pricing strategy • Define potential discounting opportunities
Sales promotions	• Describe planned sales promotions • Specify sales promotion timing and details
Marketing collateral	• Define required marketing collateral • Include social media and web marketing considerations
Sales tools and demos	• Outline sales and demo information
Advertising and demand generation activities	• Define advertising and demand-generation activities
Public relations activities	• Describe public relations activities
Industry analysts roll out and reviews	• Document plans to attain industry analysis of your product that evaluates its ability to meet current and future needs
Events	• List any tradeshow, industry, or digital events planned • Include event schedules and venues
Beta plan	• Define who will participate in product beta testing and how the process will work
Schedules and costs	• Define launch schedules and costs

Part II: Launch planning blank template

Product launch plan template	
Planning component	Recommended entries
Launch strategy	Launch the Mobile WB-3000 as a portable, innovative whiteboard solution targeting educators, businesses, and mobile professionals. Objective: achieve 3000 unit sales in Year.
Messaging and positioning	Messaging focuses on portability, collaboration, and affordability. Positioned as a “mobile whiteboard and workspace anywhere” solution with more features at a lower price than competitors.
Pricing and discounting	Price set at \$300 per unit. Discounts include 10% for bulk purchases (10+ units) and 5% discount for educators.
Sales promotions	Volume-based promotions and educator discounts. Promotions active during launch period and at events/tradeshows.
Marketing collateral	Brochures for educational institutions, product videos, landing page, social media campaigns, and engineering whitepaper.
Sales tools and demos	Sales team training (3-hour session). Quick 10-minute demo developed for customer presentations.
Advertising and demand generation activities	Social media marketing, trade show participation, influencer outreach (early adopters), and lead tracking
Public relations activities	Press releases aligned with product launch. Testimonials and feedback collected and shared for promotion.
Industry analysts roll out and reviews	Engage industry experts and early adopters to review product performance and validate market fit.
Events	Participation in 2 educational conferences (July), 3 tech events (August), and 1 government/military symposium (September).
Beta plan	25+ testers including educators and business users. Conduct pilot testing over 2 weeks at corporate and partner locations. Collect usability and satisfaction feedback.
Schedules and costs	Design finalized in March; development April–May; beta testing in June; launch in July. Costs include \$75K development, \$25K testing, and \$50K marketing/events.
